

Biblical Eschatology

Biblical Eschatology (study of End Times) is a big subject. The primary books in the Bible that deals with this subject is Daniel and Revelation. These books contain several prophecies that are many hundreds of years old. The fun part is placing what has to happen in order for these events to become true. As example, in the battle of Armageddon there is an army containing 200 million men. Many years this was deemed impossible. Now we know that China can have an army consisting of 200 million men. Was the Bible wrong or men just did not know enough to see how this is possible? Eschatology is based upon the Bible is correct when man does not know how an event can happen. In these "Last Days" we can see how these events can happen. This is called **Predications**. The most common prediction is Tribulation. This is whether the "Rapture" is Pre, Mid, or Post Tribulation. See *Last Days, Tribulation, Quantitative Easing, America, and Nations* for further definitions. The terms Tribulation and Rapture are two different terms but it is common to express them as one term. As example the terms(s) Pre -Tribulation, Mid-Tribulation, and Post-Tribulation really means when the Rapture will occur during the Tribulation period.

For the New World Order to come into being the United States must decrease in power. With Quantitative Easing this is possible.

Some people believe that Obama is the anti-Christ. Some people believe Obama acts like a Pharaoh of old. Either way he is waking up the Church.
