

Debt

Golf Story

Once there was a man that hit the golf ball in the rough. After inspecting the golf ball he saw it was in the middle of an ant bed. The man decided to play the golf ball where it landed. The first swing missed the golf ball but took out 1/3 of the dirt and 1/3 of the ants. The second swing missed the golf ball but took out 1/3 of the dirt and 1/3 of the ants. One ant said to the other ant, if we are to survive this we must get on the ball.

Monsoon

Monsoon is a weather condition that is actually defined as a season. In Arizona, we typically experience monsoon storms during the summer. Humidity levels increase and the season is marked by wind storms, dust storms, and periods of heavy desert rains.

The dust storm hit about 7:30 PM at our house on July 5, 2011. The center of the storm was about 4 miles from our house. The stats are: storm was 75 miles wide; speed was about 35 mph, and about 3 – 5 miles high. We got a lot of dirt! This was the largest dust storm that I can remember. Think of a mountain of dust coming at you, this was the monsoon that we experienced. The bulk of the storm was over in 30 minutes.

We were at home when the storm hit, however some people was on the road. Trees were up rooted but not all trees were impacted by the storm. All property in the storm's path got dirty from the dust storm. This was not a time to go out and get an ice cream cone!

Debt

The debt has been compared to an iceberg. What we see at 14.3 Trillion Dollars and what lies below the water level at 106 Trillion Dollars. This is a total of 120.3 Trillion Dollars.

Let me only address what we see at 14.3 Trillion Dollars. The White House and most of the Media says to fix the problem we must spend more money. Spending money that we don't have is what created the debt. This is wrong!

Who put us in this condition? Both parties, anyone who spends money we don't have created the debt problem. Two wrongs do not make a right.

Once you see you're in a hole, one must stop digging! The answer is not keeping on digging, or spending in this case.

You are not expected to solve your debt problem by spending money you don't have, why is the Federal Government any different?

Conclusion

The debt problem is a blend of the above stories. Now is the time to get on the ball. The debt storm may impact us differently, and we may get dirty.

The best solution is to lean on the Word, the Name, and the Blood of Jesus Christ.

Other Thoughts

"Democracy is two wolves and a lamb voting on what to have for lunch. Liberty is a well-armed lamb contesting the vote."

Benjamin Franklin

Did you notice who Obama threatened when he wasn't getting his way on raising the debt ceiling?

He threatened to not pay: Social Security Retirees, Military Retirees, Social Security disability and Federal Retirees.

He did not threaten to stop payments to illegal aliens

He did not threaten to take frivolous benefits such as Internet access away from violent inmates

He did not offer to fire some of the thousands of unnecessary federal employees that he hired

He did not offer to cut down on his or his wife's frivolous gallivanting around

He did not threaten not to pay the senators and representatives or any of their staff

He did not threaten to take benefits away from welfare recipients

He did not threaten the food stamp programs

He did not threaten not to pay foreign aid

He did not threaten to cut back on anything that involves his base voters

The list could go on and on. He is in full political re-election mode! Why are we allowing this person to destroy this wonderful country with his selfishness and his lies? His type of change is killing our country. He needs to be stopped and only our votes can stop him.
