

## Difference between Women and Men

Not all Women and Men fit into the following mold but these are the heavy hitters.

1. Women tend to process information by talking.
2. Men tend to solve problems.
3. Women are Nurturers.
4. Men are Conquerors.
5. Women are Complex – why.
6. Men are Simple – do.

A simple illustration is: don't touch the stove. A woman may say because it is hot. A man may say because I said so. Both responses are correct depending upon the age of the child.

God treats us the same way, He may or may not tell us the because of an issue or matter.

We must learn to Trust and Obey.

The main problem is that Men and Women tend to confuse on the **role** rather than **worth**.

Men and Women do best when they don't **compete** (try to win) but **complement** (balance) each other.

We may have the same goals with different ways to accomplish them!
